BIOLOGY. Anatomy and Physiology Lecturer position to begin fall, 2018. The Westminster College biology program seeks a well-qualified individual with a passion for undergraduate pre-health education. This position primarily involves teaching Foundations of Anatomy and Physiology I and II to pre-nursing students. Along with appropriate background in human A&P, applicants should have a record of effective teaching and enthusiasm for working in a collaborative, interdisciplinary, liberal arts environment.

Applicants with a Ph.D. (by the start of the appointment) are preferred; exceptional individuals with an M.S. or professional degree and extensive undergraduate teaching experience will also be considered. This is a non-tenure track, renewable position; teaching load is four lecture/lab A&P courses and one additional lab science or general education course over a two-semester calendar. Academic advising will constitute the only service required and no scholarship or research expectations are associated with the position. However, opportunities for research collaboration with colleagues and undergraduates, as well as involvement in program/college service, will be available.

Westminster College is one of America’s most admired liberal arts colleges, known for its collaborative environment and outstanding experiential learning programs. Related to the Presbyterian Church (U.S.A.), Westminster was founded in 1852 as the first college in the country to offer the same degrees to all people, regardless of gender, race, or religion. Westminster has been ranked among the nation’s top schools for “Top Colleges Doing the Most for the American Dream” (NY Times), “best value for the money” (College Factual), employment success (Educate to Career Index), graduation rate performance (U.S. News), social mobility (Washington Monthly), women in STEM disciplines (Forbes), service-learning (President’s Higher Education Community Service Honor Roll), and other categories. Around 1,300 undergraduate and graduate students benefit from close personal attention from dedicated faculty while choosing from 41 majors, 10 pre-professional programs and nearly 100 organizations. Westminster’s historic campus is located in New Wilmington, PA, a beautiful rural setting near Pittsburgh and Cleveland. The biology program is housed within the multi-disciplinary Hoyt Science Resources Center.

Applicants should electronically submit a letter of application indicating interest in the A&P Lecturer position; curriculum vitae; three letters of recommendation; a brief description of teaching experience and/or teaching philosophy, including a statement describing experience teaching and mentoring students from historically underrepresented populations; and graduate and undergraduate transcripts to Dr. John Robertson, Biology Program Coordinator, at acad_bces@westminster.edu. Materials should be received no later than March 1, 2018.

Westminster College is an Equal Opportunity Employer, enhancing learning through diversity and inclusion.
