REFLECTION, DIFFRACTION AND REFRACTION
Teacher Demo Kit & Ideas Manual

MATERIAL CHECK LIST .........................................................1
INTRODUCTION .................................................................3
GLOSSARY .................................................................5

MEASURING ANGLES
ACTIVITY 1- How to use a protractor .................................7

REFLECTION OF LIGHT
ACTIVITY 2- The Virtual Image ......................................11
ACTIVITY 3- The law of reflection..................................13
ACTIVITY 4- Parallel mirrors product multiple images ........14
ACTIVITY 5- Mirrors can change the direction
of light rays ..........................................................15
ACTIVITY 6– Angles of incidence and reflection ...............16
ACTIVITY 7– Convex, plane and concave mirrors ............18

LIGHT AND COLOR
ACTIVITY 8– Color and wavelength reflection .................21
ACTIVITY 9– Color Filters .............................................22

DIFFRACTION GRATINGS
ACTIVITY 10– Observing spectra .................................24
ACTIVITY 11– Spectroscope .........................................25

REFRACTION OF LIGHT
ACTIVITY 12– Optics box .............................................28
ACTIVITY 13– Prism ..................................................30

CONVEX AND CONCAVE LENSES
ACTIVITY 14– Real and virtual images .........................32
ACTIVITY 15– Focal length of convex lens ....................33
ACTIVITY 16– Lenses refract light ...............................34
ACTIVITY 17– Combining lenses .................................35
