

Westminster College

SPACE CAMP

SECTION 3: LITE FOOD

OBJECTIVE:

Have you ever imagined eating food as it floats around due to weightlessness from having no gravity? Here's your chance.

MATERIALS:

Plates
mini marshmallows (10 each student)
Trash can

PROCEDURE:

1. Give each student a plate and have them count out 10 marshmallows.
2. Instruct them to toss one marshmallow at a time in the air above their head and try to catch it in their mouth. If it hits floor, do not eat.
3. Count how many you catch. Record on worksheet.
