Physics 602: Capstone II
Day/time: TBA
HSC119
Dr. Craig L. Caylor   Hoyt 122   Ext.-7202
caylorcl@westminster.edu

At the end of this class, you should have completed your capstone research project, which you will present as a talk at one of the physics lunch talks and as a poster at URAC.

- Report should include bibliographies.
- Report should contain correct grammar and punctuation.
- Final report must show evidence of sufficient work on the project. Grounds for sufficiency will no doubt depend on the project and will be determined in consultation with your research advisor. If you have uncertainties about whether you are doing enough…ask your advisor!
- Presentations should be professional and thorough. PowerPoint slides should be used as necessary—don’t read them. Posters should contain enough information to stand alone as an informative product. Work in consultation with your advisor to improve both of these items.
- Plan a lunch talk presentation that will last ~ 30 minutes if there are minimal questions/discussions during your presentation. Prepare your URAC poster sufficiently in advance that you can have it printed at the WC Print Shop.
- Papers and presentations should include discussions of the theory involved in your project, your work, and your results.
- Grades will be based on…see above.
